Re: Permit Modification for Appalachian State University  
Small Type III compost facility SWC-95-04

Dear Mr. Hyle:

The Division of Waste Management, Solid Waste Section, has reviewed your request to add an additional curing area for your compost facility at a separate location on the campus of Appalachian State University off Bodenheimer Drive, permit number SWC-95-04. Your request to add this additional curing area and the manner in which it will be managed is considered approved. The total capacity of this small type III compost facility shall not exceed its permitted max of 550,000 lbs. per year without additional approval by the Division of Waste Management. These changes will be incorporated into your permit.

The permit modification is effective upon receipt of this letter. If you have any questions please feel free to contact Tony Gallagher at 919-707-8280.

Sincerely,

Michael E. Scott, Chief  
Solid Waste Section
